## **DETAILED ACTION**

### ***Response to Amendment***

This office action is in response to amendment filed on 12/21/2007. Of the previously presented claims 1-47, claims 1, 3, 6, 7, 9, 12, 14, 26, 28-29, 34, 37-39, and 43-46 have been amended and claims 2, 4-5, 8, 11, 13, 31-32, 36, 40-42, and 47 have been cancelled. Based on the amendments and cancellation of claim 47, the Examiner asserts that the following election/restriction is proper.

### ***Claim Objections***

1. Claim 14 is objected to because of the following informalities: claim 14 is dependent on cancelled claim 13. Claim 14 will be interpreted as being dependent upon independent claim 12. Appropriate correction is required.

### ***Election/Restrictions***

2. Restriction to one of the following inventions is required under 35 U.S.C. 121:
  - I. Claims 1, 3, 6, 7, 9, 10, 34-39, and 43-44 drawn to a method of transmitting information in an OFDM communication network, classified in class 370, subclass 342.
  - II. Claims 12, 14-30, and 33 drawn to a method of accessing an OFDM communication network, classified in class 455, subclass 455.

3. Inventions I and II are related as subcombinations disclosed as usable together in a single combination. The subcombinations are distinct if they do not overlap in scope and are not obvious variants, and if it is shown that at least one subcombination is separately usable. In the instant case, group II has separate utility such as a method of receiving access channel information for accessing an OFDM communication network with a minimum amount of signal overhead is clearly different from group I, which is directed to a method of transmitting information in an unsynchronized Orthogonal Frequency Division Multiplexing communication. See MPEP § 806.05(d).

The examiner has required restriction between subcombinations usable together. Where applicant elects a subcombination and claims thereto are subsequently found allowable, any claim(s) depending from or otherwise requiring all the limitations of the allowable subcombination will be examined for patentability in accordance with 37 CFR 1.104. See MPEP § 821.04(a). Applicant is advised that if any claim presented in a continuation or divisional application is anticipated by, or includes all the limitations of, a claim that is allowable in the present application, such claim may be subject to provisional statutory and/or nonstatutory double patenting rejections over the claims of the instant application.

The inventions are distinct, each from the other because of the following reasons:

4. Because these inventions are independent or distinct for the reasons given above and there would be a serious burden on the examiner if restriction is not required because the inventions have acquired a separate status in the art in view of their different classification, restriction for examination purposes as indicated is proper.

5. Applicant is advised that the reply to this requirement to be complete must include (i) an election of a species or invention to be examined even though the requirement be traversed (37 CFR 1.143) and (ii) identification of the claims encompassing the elected invention.
6. Applicant is reminded that upon the cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 CFR 1.48(b) if one or more of the currently named inventors is no longer an inventor of at least one claim remaining in the application. Any amendment of inventorship must be accompanied by a request under 37 CFR 1.48(b) and by the fee required under 37 CFR 1.17(i).
